

# Let's Know More about China Cement Industry Program

## 1. Let's know more about China Cement Industry

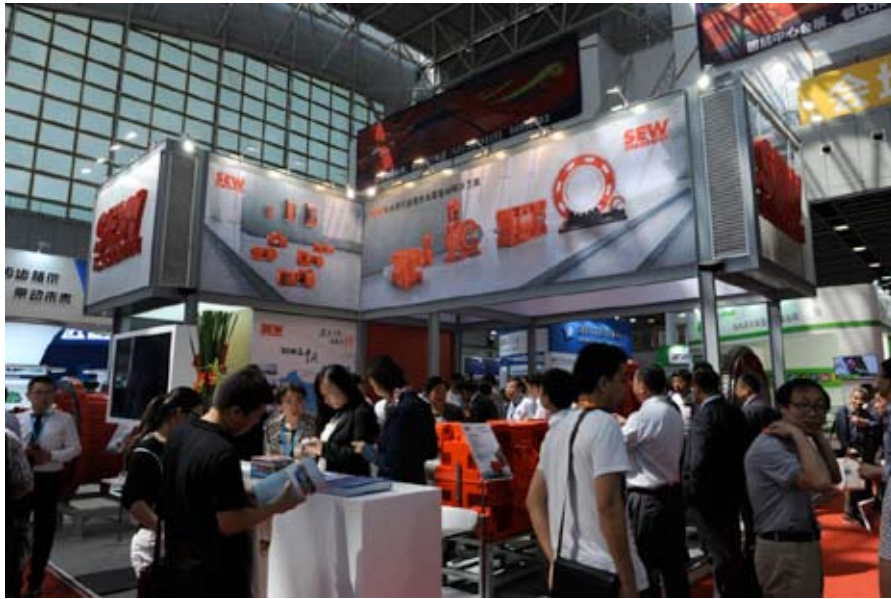

In recent years, the domestic large-scale cement enterprises have started to go abroad. From exporting only cement and clinker products to the construction of international cement projects to drive exports of cement technology and equipment, and then directly invest and build factories overseas to participate in international competition in the cement market, China's cement enterprises "going out development strategy" Product output began to shift to the capital investment stage. Years of effort and development, China's cement industry "going out" has left a bunch of wonderful footprints.

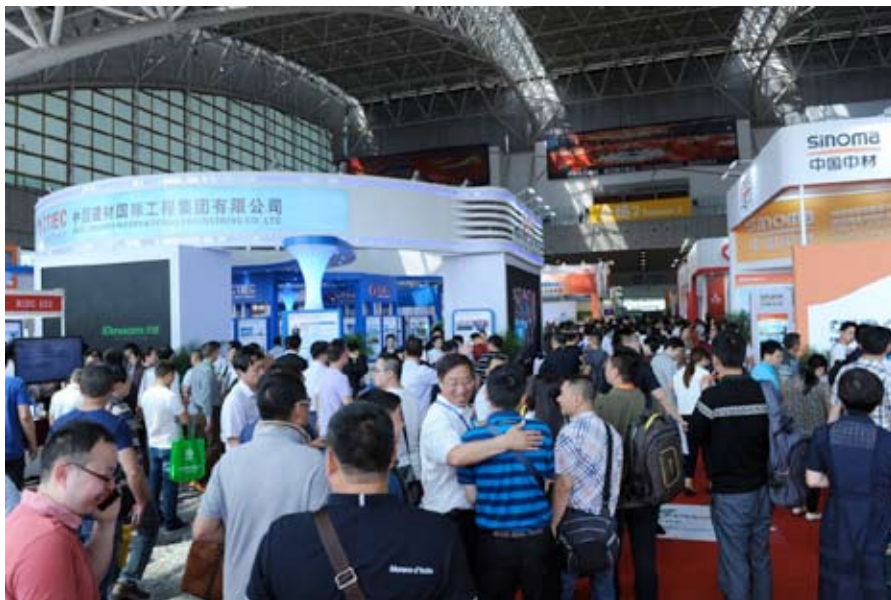

## 2. Get Close to China Cement Industry Program

### 2.1 Visit the most recognized cement events, Cementtech 2017

CEMENTTECH is the world's largest professional exhibition for cement industry with over 16,000 square meters of exhibition space! CEMENTTECH provides services for customer development to equipment manufacturers and service providers, and offer channel development and brand maintenance services.

For 2017, CEMENETTECH continues to be organized in Nanjing, Jiangsu Province and will combine upstream and downstream industries with mining, gravel and concrete for cement companies to extend the industrial chain also to increase market share. With more than 18 years of professional experiences, CEMENTTECH has now become the most influential trading platform in cement industry!

## 2.2 Participate in Sino-Arab Countries Cement Conference

Sino-Arab Countries Cement Conference is one of the concurrent events of Cementtech 2017.

It is the international platform for both Chinese and Arabian cement players to share their management and technical transformation experiences as well as the foreseen of the market in the future. Experts and governors will deliver speeches about current situation and developing trends of cement industry in Arab countries, case study of successful EPC in Middle East, the potential business opportunities for Chinese and Arabian to share, etc.

### 2.3 Visit the outstanding great productive line

Quanjiao Conch Cement is a branch of Anhui Conch Cement Co., Ltd. in Anhui Province. It has invested for over 1.5 billion RMB to construct two 5000/tons new dry cement clinker production lines and an annual output of 2.2 million tons of cement grinding system as well as a 18MW pure low temperature waste heat power generation project.

### 2.4 Visit Turn-key contractor Nearby

Turn-key contractors nearby including Hefei Cement Research & Design Institute, SINOMA International Engineering (Nanjing), etc. would like to show you the latest projects they have accomplished.
